

**Professor Alan Perkins Awarded MBE for  
Services to Patient Care and Clinical Science**

**London, UK, 18 June 2025.** Serac Life Sciences, the parent company of molecular imaging businesses Serac Healthcare Ltd and Serac Imaging Systems Ltd, announce that their Scientific Advisor, Professor Alan Perkins, has been awarded a Member of the Order of the British Empire (MBE) in the King's Birthday Honours in recognition of his outstanding services to patient care and clinical science.

This prestigious honour reflects Professor Perkins' exceptional contribution throughout his career advancing clinical research, improving patient outcomes, and shaping best practices in nuclear medicine.

**David Hail, Chairman of Serac Life Sciences,** commented:

"This recognition is testament to Alan's tireless efforts and visionary approach to nuclear medicine, where he is widely respected within medical and scientific communities. His guidance continues to be instrumental in our mission to improve patient care and bring precision medicine to patients through molecular imaging. We are all absolutely delighted for Alan and his family that his dedication and expertise have been recognised with this honour."

In addition to his advisory role at Serac Imaging Systems and Serac Healthcare, Alan is an honorary fellow of the Royal College of Physicians, Emeritus Professor of Medical Physics in Radiological Sciences at the University of Nottingham School of Medicine and past President of the British Nuclear Medicine Society. He is also one of the original inventors of Serac Imaging Systems' hybrid gamma-optical camera, Seracam®.

**Notes to Editors**

**About Serac Imaging Systems and Seracam®**

Serac Imaging Systems Ltd is a medtech company developing a portable hybrid gamma-optical camera for medical imaging. Our lead product is Seracam® which is in development to bring the benefits of high-resolution molecular imaging to a patient's bedside, instead of being confined for use in a hospital's nuclear medicine imaging department. A further unique feature of this technological approach is the overlay of a gamma image with an optical image of the same anatomical location under examination. Such portable and enhanced imaging technology has the potential to help clinicians make better, more informed and more timely treatment decisions. For further details, please see [www.seracimaging.com](http://www.seracimaging.com)

Seracam® is a UK and EU registered trademark. Serac Imaging Systems Ltd is a wholly owned subsidiary of Serac Life Sciences Limited.

**Serac Healthcare Ltd**

Serac Healthcare is a clinical radiopharmaceutical company with deep expertise in discovering, developing and commercialising innovative molecular imaging technologies. Using these targeted technologies to underpin personalised medicine in the fields of endometriosis and inflammatory arthritis, Serac Healthcare is focused on bringing to market effective tools to accelerate diagnosis, and to deliver earlier and more effective treatment decisions. Serac Healthcare Ltd is a wholly owned subsidiary of Serac Life Sciences Limited.
